#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) Responsive to communication(s) filed on \_\_\_\_.  
 2a) This action is FINAL.                    2b) This action is non-final.  
 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

#### Disposition of Claims

Claims 1 to 18 are pending in the instant application.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 to 4, drawn to a receptor polypeptide, classified in class 530, subclass 350.
- II. Claims 5 to 12 and 14, in so far as they are drawn to an isolated polynucleotide, vector, host cell and method of use, classified in class 435, subclass 69.1.
- III. Claims 13 and 14, in so far as they are drawn to an antibody, classified in class 530, subclass 388.22.
- IV. Claim 15, drawn to a receptor binding assay, classified in class 435, subclass 7.21.
- V. Claims 16 and 17, drawn to a modulator of unspecified constitution, classification undeterminable.
- VI. Claim 18, drawn to a transgenic animal, classified in class 800, subclass 2.

The inventions are distinct, each from the other because of the following reasons:

The polypeptide of invention I, the nucleic acid of invention II, the antibody of invention III, the modulator of invention V and the animal of invention VI are five different compounds or compositions, each of which can be made and used without the others. These five inventions do not reflect a single inventive concept because they lack a common feature or combination of features that distinguish them as a group from the prior art.

Inventions I and II are each related to invention IV as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the claimed assay can be practiced with an (isolated) polypeptide of invention I, a host cell of invention II, or with a cell that naturally expresses the recited receptor polypeptide, each of which are materially and patentably different products.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to John D. Ulm whose telephone number is (571) 272-0880. The examiner can normally be reached on 9:00AM to 5:30PM.

Art Unit: 1649

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Janet Andres can be reached on (571) 272-0867. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
